---> Comment Text :
The USA needs a permanent nuclear waste storage site yesterday. Storing the waste on site in Florida and other states is stupid. We are more likely to have a problem with the waste than if it were at Yucca Mountain. Look at the Sphinx...it is 10,000 years old and only a little sand blasted. If it can last intact as long as it has, doesn't it make sense that we can choose a site in the USA that will fare just as well, if not better? America needs nuclear power, now more than ever. And, America needs the permanent nuclear waste storage site operative now. Like the heros on flight 93 said, "Roll on".
